

Exclusions & Restrictions of Ill Food Handlers from Retail Food Establishments

These general guidelines for applying the *Rules and Regulations Governing Retail Food Establishments in the State of Colorado* are provided by the Colorado Department of Public Health and Environment, Consumer Protection Division. Additional information about the rules and regulations may be obtained by calling 303-692-3620, or visiting the Division's web page - www.cdphe.state.co.us/cp

GENERAL POPULATION FACILITIES		REINSTATING:
EXCLUDE	 <p>If <u>diagnosed w/ big 4:</u> <i>S. typhi</i>, <i>Shigella</i> spp., Shiga toxin-producing <i>E. coli</i> or HAV {per 2-203}</p> <p><u>Jaundice</u> ≤ 7 days {per 2-203} (Cause of jaundice may not be HAV, but the person is excluded until MD clearance & documentation is attained.)</p> <p>Experiencing <u>symptoms</u> associated with GI illness: diarrhea, fever, and/or vomiting. (For jaundice, see above and below) {per 2-201 and 2-206, no diagnosis of big 4}.</p>	<p><u>Regulatory approval</u> & MD* documentation: free of symptoms & negative stools¹ for <i>S. typhi</i>, <i>Shigella</i> or Shiga toxin-producing <i>E. coli</i> {per 2-203 via 2-204}. (HAV, see below)</p> <p>If <u>diagnosed as HAV</u>, then <u>regulatory approval</u> & MD documentation: until 10 days after jaundice onset; or 14 days after initial symptoms, if no jaundice; or, if no symptoms at least 2 blood tests show falling liver enzymes {per 2-203 via 2-204}.</p> <p>1) Symptoms cease & no FBI occurs, then via the PIC {per 2-201}.</p> <p>2) If a FBI occurs & free of symptoms, then via the PIC per MD documentation: free of agent causing symptoms or FBI {per 2-201 via 2-204}.</p> <p>3) Symptoms result from a chronic noninfectious condition, then via the PIC per MD documentation, {per 2-201}.</p>
RESTRICT	<p><u>Exposed lesion, boil</u> or infected wound containing pus or open/draining {per 2-205}.</p> <p><u>Asymptomatic & positive stool</u> for <i>S. typhi</i>, shigella, or Shiga toxin-producing <i>E. coli</i> (shedder) {per 2-201}</p> <p><u>Persistent sneezing, coughing or runny nose</u> {per 2-206, Discharges from Eyes, Nose & Mouth}</p>	<p>1) Hands or wrists, impermeable bandage, finger cot or stall covered with a single-use glove.</p> <p>2) Exposed portions of the arms, impermeable bandage</p> <p>3) Other parts of the body, dry, durable, tight-fitting bandage</p> <p>When stools are negative¹, then via the PIC per MD documentation of negative stools {per 2-201 via 2-204}.</p> <p>Once symptoms cease, via the PIC</p>
NOT ROUTINELY RESTRICTED	<p><u>Jaundice</u> > 7 days {per 2-201}</p> <p>Cause of jaundice may not be HAV, but the person is excluded until MD clearance & documentation is attained.</p>	<p>1) If <u>diagnosed as HAV</u>, SEE ABOVE and EXCLUDE {per 2-203 via 2-204}.</p> <p>2) If not diagnosed as HAV, no restrictions or exclusions apply SEE BELOW</p>
NOT RESTRICTED	Other prior illnesses and/or other asymptomatic conditions	

KEY FOR ABBREVIATIONS

FBI - foodborne illness **GI** - gastrointestinal **HAV** - hepatitis A virus **PIC** - person in charge
MD* - medical doctor or if allowed by law, via a nurse practitioner or physician assistant

¹ Two consecutive negative stools are required prior to reinstating for *Shigella* spp. and Shiga toxin-producing *E. coli*.
Three consecutive negative stools are required prior to reinstating for *S. typhi*.

HIGHLY SUSCEPTIBLE POPULATION FACILITIES		REINSTATING:
	EXCLUDE If <u>diagnosed</u> w/ big 4: <i>S. typhi</i> , <i>Shigella</i> spp., Shiga toxin-producing <i>E. coli</i> or HAV {per 2-203}	Regulatory approval & MD* documentation: free of symptoms & negative stool¹ for <i>S. typhi</i>, <i>Shigella</i> or Shiga toxin-producing <i>E. coli</i> {per 2-203 via 2-204}. (HAV, see below)
	<u>Jaundice</u> ≤ 7 days {per 2-203} Cause of jaundice may not be HAV, but the person is excluded until MD clearance & documentation is attained.	If <u>diagnosed</u> as HAV , then regulatory approval & MD documentation: until 10 days after jaundice onset or 14 days after initial symptoms, if no jaundice or if no symptoms at least 2 blood tests show falling liver enzymes {per 2-203 via 2-204}.
	Experiencing symptoms associated with GI illness: diarrhea, fever, and/or vomiting. (For jaundice, see above and below) {per 2-201 and 2-206, no diagnosis of big 4}.	1) Symptoms cease & no FBI occurs , then via the PIC {per 2-201}. 2) If a FBI occurs & free of symptoms , then via the PIC per MD documentation: free of agent causing symptoms or FBI {per 2-201 via 2-204}. 3) Symptoms result from a chronic noninfectious condition , then via the PIC per MD documentation, {per 2-201}.
	<u>Asymptomatic & positive stool</u> for <i>S. typhi</i> , <i>Shigella</i> spp. or Shiga toxin-producing <i>E. coli</i> (shedder) {per 2-203}	When stools are negative¹ , then via the PIC per MD documentation of negative stools. {per 2-203 via 2-204}.
	<u>Prior illness</u> with: <i>S. typhi</i> w/in last 3 months {per 2-203} <i>Shigella</i> or Shiga toxin-producing <i>E. coli</i> w/in last month {per 2-203}	Free of agent , then via the PIC per MD documentation {per 2-203 via 2-204- negative stools ¹ }.
RESTRICT	<u>Exposed lesion, boil</u> or infected wound containing pus or open/ draining {per 2-205}.	1) Hands or wrists , impermeable bandage, finger cot or stall covered with a single-use glove. 2) Exposed portions of the arms , impermeable bandage 3) Other parts of the body , dry, durable, tight-fitting bandage
	Persistent sneezing, coughing or runny nose {per 2-206, Discharges from Eyes, Nose & Mouth}	Once symptoms cease , via the PIC
NOT ROUTINELY RESTRICTED	<u>Jaundice</u> > 7 days {per 2-201} Cause of jaundice may not be HAV, but the person is excluded until MD clearance & documentation is attained.	1) If <u>diagnosed</u> as HAV, SEE ABOVE and EXCLUDE {per 2-203 via 2-204}. 2) If not diagnosed as HAV , no restrictions or exclusions apply SEE BELOW
NOT RESTRICTED	Other prior illnesses and/or other asymptomatic conditions
